

Software Developer

40 hours per week. Permanent contract

Army
Cadet
Charitable
Trust UK

Department: Cadet Digital Services

Level: Technical - 2

Reporting to: Product Owner

Location: UK-based (with flexible working arrangements)

Job Description

Purpose of the Post

Our Software Developers supports the development and maintenance of digital applications delivered by Cadet Digital Services, primarily on the Westminster MIS platform. Using Oracle APEX and related technologies, you'll work within an Agile environment with CI/CD pipelines and industry security principles. The role contributes to building secure, user-friendly functionality that helps reduce administrative effort for volunteers and staff.

Working as part of a collaborative digital delivery team alongside a Solutions Architect, the developer will deliver well-structured, secure solutions in line with MOD digital and security standards, supporting the effective delivery of cadet activities across the UK.

Principal Responsibilities

- Develop and maintain application components using Oracle APEX, PL/SQL, and related technologies.
- Implement user interface elements and application logic in line with existing designs and patterns.
- Collaborate closely with your product owner, testers, and other team members to understand requirements and contribute to user-focused solutions.
- Participate fully in Agile ceremonies (daily stand-ups, sprint planning, reviews, and retrospectives) and work within agreed sprint commitments.
- Apply established MOD standards for security, accessibility, and performance across all development tasks. Take part in estimating, code reviews, testing, and documentation to support quality and maintainability.
- Contribute ideas for improvements and raise technical issues through the team's established processes.
- Resolve bugs and minor enhancements raised by the Service Operations Team, prioritised and assigned to sprints as part of the development workflow.
- Suggest improvements and raise technical issues through established team processes.
- Continue developing knowledge of Oracle APEX and best practices through day-to-day delivery and supported learning.

Software Developer – January 2026
